

SECTION 09 06 00
SCHEDULE FOR FINISHES

PART I - GENERAL

1.1 DESCRIPTION

Section contains coordinated color systems in which requirements for materials specified in other sections of the Specification and/or shown on the Drawings are identified by color codes and/or paint finishes.

1.2 MANUFACTURERS

- Manufacturers' trade names and numbers used herein identify colors, finishes, textures and patterns. Subject to approval of the Contracting Officer, products of other manufacturers will be considered, provided they are equivalent to the color, finishes, textures and patterns of the manufacturers listed, and meet the requirements of the technical Specifications and Drawings, unless otherwise stated.

1.3 COLOR SELECTIONS

- It is the intent of this section to define the majority of materials selected. However, the Architect/Interior Designer will make final selections from submittals of manufacturers' standard or premium colors as defined in the section and assemble a color board to be reviewed by the VA Interiors Department and Resident Engineer. A final Approved Color Schedule will then be given to the General Contractor.

1.4 SUBMITTALS

- In accordance with SECTION 01 33 23, SAMPLES AND SHOP DRAWINGS, furnish quadruplicate samples for color approval of all materials, colors and textures specified in this section.
